

Internship Resume

Building Session 2026- 27

IIT MADRAS

General Pointers

- Your resume's free space is **extremely valuable**.
- Rome wasn't built in a day, so is your resume - it will require multiple iterations (In general 10-11 versions)
- A resume screen is the easiest way to reject a candidate (if it does not follow certain rules or has these common mistakes)

General Points

Fonts and Color Scheme:

- **Font Size:**

- It is preferable to have a font size between 9 to 12.
- Best: Font size of '10' for the content and '12' for the headings
- Fonts that are preferred by most:
 - Sans Serif fonts like **Calibri**, **Arial**, Tahoma, Verdana, Helvetica
 - Serif fonts like: Garamond, **Times New Roman**

- **Size of Paper:**

- Keep the size of the resume strictly within an A4 sheet (Don't try to have a bigger-sized paper to include the content; Trust us the firms can figure out)

- **Number of colors:**

- A maximum of 3 colors (this includes the background color as well).
- Please use shades of the same color rather than using completely different ones.
- Best colors on a resume are **Black**, **White**, and **Blue**. They appear modern, trustworthy and grab the reader's attention without being distracting.

Formatting content:

- Try to exclude **blank spaces** as much as possible. There is no hard rule as to how much white space you should have in the resume. It is recommended to have 450-600 words on your resume in total (a 2-2.5 minute reading)
- Quantify your achievements, results, and strategies as much as possible (Putting out numbers is important).
 - Example : **Guided 1300+ students for Intern Season'22 while managing 20+ company tests & interviews**
- Always use bullet points for content within a particular sub-section. Paragraphs make the resumes seem cluttered.
- Use Action Verbs to describe the points. Never write complete sentences or repeat content in the resume. (A list of action verbs for different profiles and skill sets have been provided at the end of this document.)
- Use the **STAR** and **CAR** formats to structure your points. STAR: Situation, Task, Action, Result and CAR: Challenge, Action, Result.

Sections of a resume :

Headings/sections to be included in a resume are:

Education/Scholastic Information and Achievements:

- Make an exhaustive list of achievements, rank them by magnitude, and group them section-wise; minor achievements add value in sections where the resume is weak
 - School & College information with Final Percentage and Interim CGPA (For calculations, rounding is not permitted) JEE, KVPY, NTSE, Olympiad, and
 - Other competitive exam achievements (ex-CFA)
- Skills (primarily technical and software skills are included in the section)

Professional Experience (Such as internships/jobs previously held)

- Corporate/Startup Internships

Projects

- Research Internships and Projects

Courses

- Curriculum and External Courses (on Udemy, Coursera, etc.,)

Positions of Responsibilities

Co-curricular Activities

- Case competitions, Hackathons, Technical Conferences

Extracurricular activities

NOTE: It is not necessary to include all of the above sections. Analyze your strengths and create profile-specific resumes.

Common Mistakes in a resume

- More than one page
- Other sizes Pages, not A4.
- Putting abbreviations but no expansion anywhere on the resume (abbreviation expansion as a footnote)
- More than one sentence per line/bullet point, making paragraphs (Every point must be of one line and No Paragraph)
- Inconsistent formatting - every section has a different font and size.
- Should be easy on the eyes to read - Avoid walls of text with minimal spacing

- Avoid grammatical and spelling errors at all costs (bare minimum expectation)
- Start adding random “special skills” when it feels the resume is too short.

Customizing for Job Profiles

Core:

- Mention the core courses and labs relevant to the profile
- Important projects done under the department
- Relevant software that is known to you related to your discipline
- Relevant competitions won

Non - Core:

Consulting

- Analytical abilities
- Communication skills and Team work
- Academic performance
- Spikes in any field

I-Banking (Front-end)

- Analytical abilities
- Department/ Specialization
- Academic performance
- Communication skills

FMCG

- Working in teams
- Academic performance
- Grasp of technical concepts

Tech

- Knowledge of concepts
- Academic performance
- Analytical abilities
- Programming languages known

I-Banking (Back-end)

- Problem/puzzle-solving skills
- Communication skills
- Working in stressful situations

IT

- Knowledge of concepts
- Academic performance
- Analytical abilities
- Programming languages known

Sample Resume

INDIAN INSTITUTE OF TECHNOLOGY MADRAS			
EDUCATION & SCHOLASTIC ACHIEVEMENTS			
PROGRAM	INSTITUTION	CGPA/%	YEAR
Metallurgical and Materials Engineering (B.Tech) IDDD: Complex Systems & Dynamics (M.Tech)	Indian Institute of Technology Madras	8.8	2020-2023
Class XII (CBSE ¹)	Maharishi Vidya Mandir Sr. Sec. School	9.2	2018
Class X (CBSE ¹)	Maharishi Vidya Mandir Sr. Sec. School	9.5	2016

CBSE¹ - Central Board of Secondary Education; AISSCE² - All India Senior School Certificate Examination; NPTEL³ - National Programme on Technology Enhanced Learning

Review

Getting the resume reviewed is necessary to understand how an average reader reacts to it.

Who should review your resume?

- Seniors
- Friends capable of judging your resume well
- Family members working in the corporate world

Getting the right feedback

- 'Feel' of the resume: what personality and skills it reflect
- Can it be shortened? Is it repetitive?
- Does it draw attention to the desired points?

The Bottom line

- You have to be comfortable with what your resume says about you
- Be true in the resume and be prepared with a few examples to validate your claims
- Know your resume thoroughly

Common Misconceptions

Stay clear of common misconceptions and clarify with reliable sources

WHAT YOU THOUGHT Recruiters don't know

- which activities on campus are really worthwhile
- Mediocre PT/project work can be exaggerated to make it impressive
- I must mention all events I 'participated' in to show enthusiasm

WHAT IS TRUE

- Most firms have IITM alumni who are up-to-date with campus trends
- Recruiters know what to ask you to figure it out
- Participation => Did not win; put only achievements

Action Verbs

For Engineering/Technical roles:

• Conceptualised	• Computed	• Extrapolated
• Predicted	• Installed	• Engineered
• Calculated	• Segmented	• Restructured
• Arbitrated	• Estimated	• Overhauled
• Devised	• Assembled	• Unified
• Visualised	• Debugged	• Customised
• Standardised	• Steered Tested	• Validated
• Diagnosed	• Troubleshooted	• Automated
• Strengthened	• Deployed	• Architected
• Discovered	• Added	•

Design and Creative Skills:

• Acted	• Correlated	• Customised
• Designed	• Developed	• Directed
• Established	• Fashioned	• Illustrated
• Instituted	• Tabulated	• Performed
• Planned	• Streamlined	• Revised
• Revitalised	• Integrated	• Structured
• Shaped	• Proved	• Validated
		•

Financial Skills:

• Administered	• Allocated	• Analysed
• Appraised	• Audited	• Balanced
• Budgeted	• Calculated	• Computed
• Managed	• Planned	• Projected
• Researched	• Restructured	• Modelled

Process Improvement, Consulting and Operations:

• Combined	• Consolidated	• Converted
• Decreased	• Devised	• Eliminated
• Expanded	• Improved	• Increased
• Innovated	• Minimised	• Maximised
• Modernised	• Recommended	• Refined
• Reorganised	• Resolved	• Revised
• Serviced	• Simplified	• Transformed
• Unified	• Widened	• Broadened
• Revamped	• Collaborated	• Trimmed

Problem Solving Skills:

● Arranged	● Composed	● Conceived
● Controlled	● Co-ordinated	● Investigated
● Itemised	● Operated	● Prepared
● Processed	● Produced	● Reviewed
● Scheduled	● Simplified	● Transformed

Research and Analysis Skills:

● Classified	● Assessed	● Collated
● Defined	● Devised	● Evaluated
● Forecasted	● Identified	● Traced
● Researched	● Tested	● Interpreted
● Verified	● Uncovered	● Clarified
● Collected	● Critiqued	● Diagnosed
● Extracted	● Inspected	● Inspired
● Organised	● Reviewed	● Summarised
● Surveyed	● Systemised	● Interviewed

Management Skills:

● Chaired	● Consolidated	● Assigned
● Delegated	● Contracted	● Directed
● Executed	● Guided	● Planned
● Prioritised	● Produced	● Recommended
● Scheduled	● Supervised	● Managed

Entrepreneurial Skills:

• Created	• Composed	• Conceived
• Established	• Founded	• Generated
• Implemented	• Launched	• Led
• Opened	• Originated	• Pioneered
• Promoted	• Started	• Released

Appendix: FAQs

Q. How do I justify a low CGPA?

A. Prove that time was spent in other worthwhile activities which developed adequate intellectual and social skills

Q. How do I balance between exaggeration and understatement?

A. Get it reviewed by friends who are unaware of your background. Remember that you must be able to carry off the image that your resume portrays.

Q. Should I include maximum activities to prove that I didn't waste time?

A. Show maximum output, not activities. Focus on excellence, not just enthusiasm.

Q. Should I add major achievements at school level?

A. Only if you have no other significant achievement in that section, else avoid

B. It runs the risk of pointing out that you had potential but didn't utilize it in the last 4-5 years

Q. How detailed should descriptions of projects/achievements be?

A. Enough to reflect skills and results, avoid unnecessary details that dilute focus

Q. Which course projects should I include?

A. Those that reflect achievements or innovation more than expected

B. Those involving a major concept that you would like to discuss in the interview

Q. How technical should the language/ terminology be?

A. Avoid technical details as the recruiter might not be familiar with it, focus on time/ cost saved and other outputs

B. Avoid IITM-specific terms or events that the recruiter might not be familiar with

Q. How do I know which skill/ achievement/ project can be removed?

A. Just remove it and see how much difference it makes and if the skill reflected by it can be effectively brought out using some other item

B. Avoid repeating achievements in the same field (e.g. seminar and BTP in the same topic, coordinator and Core in the same fest).

It is obvious that you can't reach the higher level without excelling in the lower one!

Q: Why are you applying for a 6-month internship instead of a 2-month one?

A: I want deeper exposure to real problems — enough time to contribute meaningfully, not just shadow.
6 months lets me take ownership of a project lifecycle.

Q: Your resume shows only 2-month projects. How will you handle a 6-month commitment?

A: My projects may be short, but I've sustained personal projects and coursework over semesters. I'm comfortable with long-horizon work.

If Choosing 2-Month — How to Defend

Q: Why only 2 months? Did you not want deeper exposure?

A: Two months done right can be extremely focused. I'd rather go deep on one problem with full energy than stretch thin over 6 months with diminishing output.

Q: Doesn't a 6-month intern have an edge over you?

A: Not necessarily. Depth matters more than duration. I'm using the remaining time for a second internship / research project / competitive prep — which gives me breadth that a single 6-month role can't.

“ interviewers will probe everything, hesitant answer’s signals the student didn't make an intentional choice. Confidence in why matters more than what u picked. ”
