

EDUCATION AND SCHOLASTIC ACHIEVEMENTS

Program	Institute	% / CGPA	Year
M.Tech. (Data Science & Artificial Intelligence)	Indian Institute of Technology, Madras	8.60	2026
B.E. (Artificial Intelligence & Machine Learning)	BMS Institute of Technology, Bengaluru	8.83	2023
Class XII (CBSE)	Navkis Educational Centre, Bengaluru	85.6	2019
Class X (CBSE)	Navkis Educational Centre, Bengaluru	9.80	2017

- Secured **All India Rank 46** in GATE Data Science and Artificial Intelligence (DA) 2024 – Top 0.08% of registered candidates
- Achieved **4th place** as an individual contributor in IIT Bombay's Technical Fest NO CODE ML Competition 2022

PROFESSIONAL EXPERIENCE

Technical Intern II Cisco (May'25 – Jul'25)	- Developed Agentic AI Assistants to autonomously debug GDB session failures from corefiles and traces - Optimized RCA via CScope integration, cutting debugging time by 40% and LLM token usage by 70% - Built React UI & Django backend to integrate Catalyst router testing on YangSuite with CDETS platform Automated XPath test coverage reporting and log parsing, reducing bug resolution time significantly
Solutions Support Engineer SAP Labs (Apr'23 – Jul'24)	- Drove team adoption of AI tools in support tasks, and documented and release tested cloud products - Customized SuccessFactors for clients and executed RCA on issues via Splunk and network logs analysis - Resolved 200+ cases and client escalations with >90% SLA adherence and Customer Satisfaction Rating - Coordinated joint efforts between PMs and internal teams to ensure regression free product releases
Data Specialist Intern Giniminds (Aug'22 – Sep'22)	- Optimized supply chain operation using Neo4j Graph Database on 140k+ datapoints and 13 entity types - Conducted requirements analysis with clients to align business needs and technical implementation - Developed real time analytical dashboards using graph data modelling and geospatial visualization - Implemented and optimized least cost routing for product deliveries factoring in real time data feeds
Junior ML Engineer Omdena (Jun'22 – Sep'22)	- Built and deployed a fine-tuned VGG-16 CV model for waste classification achieving >91% accuracy - Enabled multi-category waste segregation to optimize large scale municipal waste incinerators - Developed web-scraping pipelines to generate potential client data enabling outreach to 1000+ leads - Optimized the data for downstream applications and created reports to identify high priority targets

PROJECTS

Physics Informed Neural Networks (Master's Thesis)	- Research on integrating physical laws into Neural Net learning: Guide – Dr. Balaji Srinivasan, DSAI, IITM - Worked on implementing PINNs and PIELMs from scratch using insights from many well cited papers - Carried out mathematical formulation of Physics integrated loss functions to constrain network learning - Worked on building an interactive software suite to deploy the models for physical simulations
Implementing Neural Nets and Transformers (DA6401 – Intro to DL)	- Coded ANN Backpropagation from scratch supporting multiple optimizers and other hyperparameters - Implemented a CNN and fine-tuned VGG-19 model to compare the performance on classification tasks - Built seq2seq Attention model using RNN, LSTM, and GRU for Hindi & Kannada to English transliteration
Fraudulent Transaction Detection System (DA5402 – ML Ops Lab)	- Developed an end-to-end fraud detection system with DVC and MLflow for tracking and reproducibility - Built a Streamlit and FastAPI based web app with feedback loop to continuously improve accuracy - Containerized with Docker and made dashboards with Prometheus and Grafana for metrics monitoring
Airline Review Sentiment Classification	- Evaluated ML models and developed a Flask web app for sentiment polarity detection of airline reviews - Collected and analysed a custom dataset via web scraping and Twitter API for model training and testing
Adulteration Detection Device and App	- Built an Arduino IoT device programmed in C to detect food adulteration with hardware sensors - Designed an Android app in Kotlin with Firebase cloud service integration for food inventory tracking

POSITIONS OF RESPONSIBILITY

Placement Core IIT Madras, DSAI	- Handled industry outreach, campus logistics and end-to-end recruitment processes for 50+ companies - Hosted upskilling programmes and coordinated Placement and Internship drives for 350+ students
Teaching Assistant IIT Madras	- Courses – Foundations of ML, Programming and Data Structures (Theory & Lab), Engineering Principles - Carried out tutorials, doubt solving sessions, setting of assignments, invigilation and grading of exams
Social Media Manager and Editor	- Managed online presence and outreach for Brainium, Technical forum of Department of AIML, BMSIT - Wrote articles, curated content and served as Editor for Circadian, department technical magazine

COURSEWORK AND WORKSHOPS

- DSAI Courses:** Machine Learning, Deep Learning, Computer Vision, NLP, ML Ops, Data Analytics, Math for ML, Data Visualization
- CS Courses:** Data Structures & Algorithms, OS, Computer Organization, Computer Networks, DBMS, System modelling & Simulation
- Google Student Launchpad:** Learnt DSA, problem solving and communication with coding challenges and code optimization tasks
- JPMorganChase SDE Virtual Experience:** Insights on stock price interfaces with JPMC frameworks and visualizing data for traders

SKILLS AND TOOLS

- Languages:** Python, Java, JavaScript, C, SQL, Cypher-Neo4j
- Skills:** ML model building and deployment, Data Analysis, Deep Learning, Neural Networks, Full Stack Development
- Frameworks:** Tensorflow, PyTorch, OpenCV, Scikit-learn, NLTK, Flask, Selenium, FastAPI, ReactJS, Streamlit, Django, MLflow
- Tools:** Git, Docker, DVC, Wandb, Firebase, Android Studio, Linux

EXTRA-CURRICULARS

- University team **Football** player at BMSIT, Semi-finalist of Schroeter's tournament and Dean's trophy participant at IIT Madras
- Organizing member for Cultural and Technical Fests, **Community Service** Volunteer – Rotaract Club of BMS Yelahanka
